**Prepared for:**

**Example**

## Competition Link Analysis

This following table contains a list of link pointing to the selected competitor URL. You can use it to:

1. Analyse competitors advertising, marketing and public relations activity
2. Find marketing opportunities
3. Assess how best to compete using key strengths and weaknesses of your competition
4. Identify business relationships

### Definitions:

- **PageRank :**

Page Rank (often denoted PR) is a quantity defined by Google that provides a rough estimate of the overall importance of a web page. Many factors influence Page Rank, thus it is a poor indicator of how well a page ranks for particular keywords. Pagerank however is not what defines ranking within search results. It is merely one of the factors which effect the search-results rank of a website.

- **Anchor text**

It is the visible, clickable text in a hyperlink.

- **Outbound Links**

A link that points away from a website. It is often preferential to use descriptive outbound linking to make it easy for search engines to understand what the target website or web page is about.

- **URL Strength** =  $(PageRank + 1)^3 \times 4 / \text{outbound links}$

## Short Executive Summary

Below are outlined some of the findings stemming from the *free* competition analysis report. The full report contains a detailed analysis of the report data. This is just a fraction of what we could deliver if engaged.

- Some of the key findings are mentioned here in the full report.
- More detailed analysis is also provided in the full report.

## Further details

The following aim to provide an example and explanation to help interpret the data in the link analysis table.

	URL	PageRank	Anchor_Text	Link Type	Outbound Links	Strengt h	Links_To
1	<a href="http://www.icis.com/blogs/green-chemicals/2010/03/">http://www.icis.com/blogs/green-chemicals/2010/03/</a>	3	Pennakem	Good	152	2	<a href="http://www.pennakem.com/">http://www.pennakem.com/</a>
2	<a href="http://www.minasolve.com/">http://www.minasolve.com/</a>	2	PennAkem	Good	7	15	<a href="http://www.pennakem.com/">http://www.pennakem.com/</a>

The first URL (above) has a higher PageRank (definition on page 2) which indicates that Google sees it as having more authority than the second URL. However, the first URL contains a very high number of links (152 links) going to other sites, which makes it hard for specific link to pennakem.com to stand out; hence why the Strength of that link is low (strength: 2). Similarly, the second URL may have less PageRank but it contains a lot less links (7 links) which means it's easier for the link to pennakem.com to stand out; hence why the Strength is higher (strength: 15).

URL	PageRank	Anchor Text	Link Type	Outbound Links	Strength	Links To

### What is Angina (types of angina)?

Angina is chest pain or discomfort resulting from decreased flow of oxygenated blood to the heart. In most cases a symptom and not a disease. [1,4](#)

The heart requires an adequate blood supply to function properly, and oxygenated blood is fed to the heart through and reducing the amount of blood able to flow through them. When the heart is required to pump more blood than

There are three main types of angina:
